For professionals in the optical communications industry

Fibre Systems – the leading magazine for optical networking professionals

Keely
Portway
Editor

***Fibre Systems* has been successfully delivering vital business information to the optical communications industry since 2013.**

Many of our readers may remember even further back to *Fibre Systems Europe*, as it was known when it originally launched in 1996.

Our audience (including component and subsystem vendors, network equipment manufacturers, planners, installers, systems integrators, global operators and end users of fibre-optic networks) tell us that they still place real value on the independent and unbiased editorial content we provide today.

Of course, as the technology used within optical communications has evolved, so too has your industry magazine. Today, *Fibre Systems* boasts a variety of diverse channels to suit our readers' appetites for great content, consumed in a way that suits them.

Our magazine is produced and distributed five times a year – including the popular Yearbook – in both print and digital

formats. We regularly update our website (www.fibre-systems.com) with news, features, opinions, product launches and press releases to ensure that readers are kept informed of the latest developments as they happen.

The website also hosts a useful library of resources, including viewpoints, white papers and webcasts. Meanwhile, our monthly email newsletters – *Fibre Systems* Newslines and Productlines – contain exclusive content that we curate and deliver directly to your inbox.

2020 was a strange year for the industry – as it was for everyone – with Covid-19 taking away the events we love to attend with one hand, but bringing to the forefront the importance of connectivity with the other. How else could the world work or learn from home, stream content and try to continue in as normal-a-way as possible during lockdown?

In addition, the non-covid-related industry drivers have not gone away. The evolution to 5G draws ever-closer, bringing with it greater demand on the backhaul network;

“Our audience tell us that they still place real value on the independent and unbiased editorial content we provide today”

emerging technologies and methods to support 5G, as well as increased security. The need for more high capacity networks shows no signs of abating, with full-fibre widely espoused as the holy grail. This in turn has a number of associated challenges, including cost, logistics, politics, associated technology, fibre supply, and installation skill requirements.

Higher service levels will be required as subscribers increase, and even more varied product ranges will be an important development. Operators will also need to be able to adapt for digital as intelligent and even automated networks emerge with software innovations.

You don't need us to tell you about the rapidly rising demand for bandwidth, which has largely been driven by wider video consumption and streaming. It does, however, provide a nice segue into the development in the last couple of years, of our FSTV video product. This is where industry spokespeople offer their opinion and advice in their own words. In addition, 2020 saw many of our advertising customers benefit from our relatively

recent launch of the 'using content' suite of products. This allows you to share your valuable knowledge and experience in a way that blends seamlessly with our high-quality editorial content, and includes the Tech Focus, Featured Technology and Feature Case Study options, as well as the chance to take part in your own webcasts – something that proved particularly popular in the time of covid!

I was already proud to be part of the optical communications community and having shown the world what we are capable of during times of crisis, as well as under 'normal' circumstances, that pride has only increased. I hope you'll continue to keep in touch to let me know about the issues that matter to you, and what you want to see in your industry magazine in 2021 and beyond.

“Can I get to the
people **I really want**
to reach?”

Who are we?

Fibre Systems is the only global title dedicated to the optical communications industry, reaching more than 18,000 professionals across multiple platforms. Our independently-written feature content provides unrivalled insight into the technologies used in the optical communications industry.

We exist for our audience. Our content is delivered across multiple channels and platforms, with each product designed to invite the reader to engage in the way that suits them.

We have many, exciting opportunities for your organisation to harness the power *Fibre Systems* and reach our on-target readership.

**Build
your
brand**

We all know that ensuring positive brand presence is the non-negotiable foundation for any serious business. It supports the direction of your organisation and facilitates the success of everything you do throughout the year.

In theory, brand visibility is simple. Make sure you put your message in front of the right people, as often as possible.

In reality, there are pitfalls at every turn. Everything is 'the next big thing', and it becomes very easy to be positioned in the wrong place and end up throwing good money after bad.

Fibre Systems has brand-supporting options available across all platforms, so let us be your partner as you build your presence. Our suite of 'brand visibility' products place you alongside relevant, consistent and trusted third party content.

The goal is often to generate new engagements and attain high quality leads, but it all starts with a base of trust in your brand.

Build your brand Magazine

***Fibre Systems* started as a print magazine. Over the years we have introduced a digital version for those who prefer a digital format, and increased the places where it is distributed – at heart though, it is the foundation of everything.**

We also have our second Fibre Yearbook this year. The content and distribution are both ‘evergreen’, focussing on relevance throughout the year, and distributed at all industry events.

Work with our advertising team to start your campaign here. You could focus on relevant features and events that you are attending, or perhaps you feel that you would like to be visible all year around.

Editorial calendar 2021

Issue	Content	Major show distribution

Bonus distribution

Make your exhibition work harder for you! By focusing on the events you attend, you can stop worrying about whether you get value from three days hard work and instead make sure your message is driven home before, during and after the show.

Of course the uncertainty around the impact of Covid-19 has made physical events less reliable. Our events team work with each organiser to make sure we distribute to those audiences whether the event is virtual or happens for-real.

“I know digital platforms are important, **but how do I know I am being seen by the right people?**”

Build your brand online and via email

Reaching the digital *Fibre Systems* audience has never been easier. The website is a hub of analysis, feature content, technical videos and news, while our regular email newsletter, Newsline is an opt-in news and feature service delivered to inboxes every month.

Both the website and Newsline are presented in a traditional desktop format and via a responsive mobile version.

Why use the *Fibre Systems* digital brand-building suite?

Relevance

You will be seen by an audience of optical communications professionals

Credibility

Our content is independent. Being alongside this content, means you are associated with this third-party credibility

Platform

Being seen in a digital environment is increasingly important. Being seen by an opt-in audience on these platforms is perfect

Using content

‘Using content’ is a broad term. We hear about it all of the time, and there is no doubt that the production and delivery of content is a complex area. You produce lots of marketing content and here at *Fibre Systems* the delivery of quality content is our lifeblood.

How do we join forces to harness the value of what we collectively produce and deliver a better all-round experience for our audience?

**With *Fibre Systems*,
‘using content’ means:**

- Delivering your content to our audience
- Associating your organisation directly with our content
- Combining your expertise and our platforms to do a bit of both!

**Our ‘Using content’ suite
provides intelligent hosting
and distribution of your:**

- Technical explanations;
- Visual demonstrations;
- Application case studies;
- Thought-leadership/opinion influence

That’s not all, though!

Fibre Systems is always looking for ways to improve our audience experience. We have some super-cool, exclusive opportunities for native advertising. This puts you directly into the main stream of *Fibre Systems*’ editorial. Prime real estate!

“Sure, I have some solid branding in place, **but how can I use the content I have worked so hard to produce?**”

Content Sponsorship

The first way we can use content is for you to associate yourself with the regular *Fibre Systems* offerings. We have two great ways for you to do this.

A&O section sponsor

The Analysis and Opinion (A&O) section of our magazine and website is a collection of exclusive editorial columns written just for us by leading experts from throughout the world of optical communications and distributed across a multitude of platforms.

Sponsoring this section is about being part of the conversation. We could be talking about political change, environmental issues, vocational development – who knows! The topics may vary, but the value for you remains – make being part of the conversation one of your core brand-values.

A&O is delivered in-print, hosted online and via a stand-alone email. You will receive:

- Logo on (A&O) page of website;
- Logo on monthly A&O emails;
- Logo on A&O pages in magazine

A&O section sponsor price
£995 per issue

Webcasts

Following the Covid-19 pandemic, webcasts have become increasingly important as people look to become positioned as an industry thought-leader.

***Fibre Systems* has two ways that you can work with us on Webcast delivery**

Sponsor a *Fibre Systems* Webcast

As the year goes on, our editorial team will produce webcasts that are completely editorially-led. This means that rather than a calendar of topics set out at the start of the year, the webcast will be focussed on timely industry discussion. You can sponsor these events!

What do you get as a sponsor?

- Branding on all pre-event, post-event and in-event activity and promotion (across all platforms)
- Leads – Since these webcasts are free-to-attend, delegates will have the opportunity to opt-in to your marketing lists at the point of registration.

***Fibre Systems* webcast sponsor**
£1495

Sole sponsor

Here, you are in control of everything. The content is driven by you, and as sole-sponsor, you will receive all leads.

As sole-sponsor of your webcast you get:

- *Fibre Systems* team as host, moderator and coach (we will offer pre-event run-throughs, format coaching, as well as helping with suggestions for topics and case studies)
- 3 x pre-event promotions to the *Fibre Systems* database
- 1 x post-event promotion to the full database
- House ad in the magazine
- Hosting online
- Promotion via *Fibre Systems* social media
- MP4 of the event for your own use
- List of questions asked during event
- All lead data – ‘lead data’ refers to a one-time follow up from you, with permission required as part of registration. Delegates will also have the opportunity to opt-in to your marketing lists at the point of registration

***Fibre Systems* webcast sponsor**
£8000

Using Content – Hosting your content

These products have your offerings at heart.

You work hard on creating your own innovative content - so why not partner with us to present it to a wider audience than simply your own database?

Fibre Systems has designed these products to focus on relevance, interactivity and ultimately the combination of your expertise and our platforms to provide our audience with a better experience.

Tech Focus

Tech focus brings the focus onto a particular technology and delivers an editorial overview of this industry area, as well as the products available across that market.

Tech focus is multi-platform (print, online, email and socials), allowing you to place your content alongside our own in the full knowledge that the topic is on-point and the audience is engaged and relevant. There are two options here - look at the calendar for your area of expertise and choose either:

Lead sponsor (One sponsor per topic)

- Exclusive branding on magazine and online version;
- Sole sponsor branding on the email version, including 468x60 banner;
- Top-spot 'enhanced product' in both magazine, email and online version
- 3x positions linking to your content on the Tech focus email - use your videos, app notes, stories etc here

Fibre Systems tech focus lead sponsor

£2950

Tech Focus Calendar

Winter: **High-capacity optics**

Spring: **Test & measurement**

Summer: **FTTx access equipment**

Autumn: **Installation equipment**

Enhanced product entry

- 150 words plus hi-res image, highlighted and boxed-out within the magazine version
- Inclusion in email version (summary) and online (full text)

Fibre Systems tech focus product entry

£850

Productline

Productline is our popular entry-level email marketing service for new product launches. It also provides a cost-effective platform for you to drip-feed your product information to a huge audience. As you build your full campaign, use productline as a targeted tool to back-up your high-visibility activity.

- Comprises headline, 190 x 190 image, 40 words plus web link
- Sent via email (9 products per email) to opt-in database of 9,000 industry professionals.

Productline price

£500 per issue

Featured productline price

£850 per issue

White Papers

The *Fibre Systems* reader is typically a high-level industry professional and as such they crave high-quality information. You should use this to your advantage.

By hosting your white paper with *Fibre Systems*, you place yourself as a thought-leader, reach the right audience with very specific content and of course, generate leads.

Our white paper package includes:

- Hosting online for a year (including front page promotion for minimum one month)
- Promoted via 'educational resources' email
- Highlighted via house advert in magazine
- Option to gate content and collect lead information

White paper price

£1250

Using Content - Native Advertising

The third way of using content in partnership with Fibre Systems is through Native Advertising.

Here we look for ways that your expertise and experience can enhance and complement what our audience already receives, then place it directly into the main-stream of editorial content. Our editorial integrity is paramount here so the focus is squarely on quality - when we work together on projects we consider it a partnership and will guide you as we go.

Featured case study

A Feature case study appears alongside a related feature (see our editorial calendar for our planned features for the year), both in the magazine and online.

Comprising approximately 750 words, plus an image, a feature case study is a full page of content, designed to appear a part of the feature. You can supply the content yourselves, subject to it meeting our editorial standards, or we can work with you to create it.

An excellent feature case study frames our existing topic in a way that the reader can personally relate to.

- One Feature case study available per calendared feature
- PDF and copyright provided post-publication (for your ongoing marketing activity)

Featured case study price

£2950

Viewpoint

Viewpoint represents an opportunity for your company to demonstrate thought leadership or leading opinion. From your CEO to your technical director and beyond, you will have a broad range of experience in your company, and more often than not, they'll have the experience and knowledge to form an opinion on industry-wide matters that others will be interested to hear. Raise their personal profile, and show how the expertise within your company places you above your competitors.

- Comprising approximately 750 words, plus an image, a viewpoint appears online only, but is promoted via the magazine (as part of our own house adverts), and via email.
- Can be written entirely by you, subject to our editorial standards, or with our help.

Viewpoint price

£1250

(additional charges may apply if using our editing and writing services - see Content services)

Featured Technology + White Paper

If you have a genuinely disruptive technology, we will create an article that uses the information detailed in your white paper as the catalyst.

Considering whether your technology is 'disruptive' means asking "does my technology affect the industry in a new and exciting way?"

It could influence efficiency, cost, speed, environment etc.

Also, talk to us! We consider this a partnership and will work with you.

It is important to remember that the article is Fibre Systems content so will be written by us and will have our audience in mind. You will not be asked to write the content, but may be invited to contribute in a similar way to our usual features. Your white paper will be advertised at the end of the article.

- Appears as two pages in the magazine, comprising a 1,200 word feature (written by us), plus a half-page house advert pointing towards your white paper.
- Also appears online as a feature, with a footer advert pointing towards your white paper.
- Featured on our educational resources page.
- Promoted via email campaign
- Highlighted via house advert in magazine
- Option to gate the white paper online and collect lead data

**Featured technology
+ white paper price
£2950**

Fibre Systems TV

Carefully created to complement the existing suite of industry-leading products from *Fibre Systems* magazine, Fibre Systems TV (FSTV) is our platform for high-quality and up-to-date video content. Hosted and promoted across all of our respected media, FSTV provides unique, relevant information – presented by our professional team to a qualified and established audience.

Work with FSTV to distribute your own existing content, or create brand new videos – working with a team of industry experts.

FSTV audience

The FSTV audience is a primarily European selection of opt-in, highly skilled, optical communication industry professionals... including:

- Service providers;
- Cloud and data centre operators;
- Enterprises and businesses using fibre optics;
- OEMs, component and subsystem vendors;
- Installers and system integrators;
- Test and measurement suppliers.

FSTV distribution

FSTV is hosted on fibre-systems.com and YouTube, with all finished video content promoted across all of our various platforms. Recipients engage with our content via:

- *Fibre Systems* magazine;
- Fibre-systems.com;
- Various *Fibre Systems* email products;
- Social media channels.

We are able to provide filming at strategic European events as well as offering an opportunity to create content from your own offices.

- Create your own corporate video (Price POA)
- Present your event activity via video (Price POA)

All video is hosted and promoted by us, but available to, and owned by you. Promoted across all our media channels

We welcome a consultative approach to our FSTV platform. While there are many opportunities to simply host your content, we also have a number of bespoke options that can considerably improve your brand position and corporate identity.

Content services

High quality writing is in short supply, and many marketing teams simply don't have the in-house resource to be able to turn out the right content frequently.

Outsourcing to a freelancer or a PR company is always an option of course, but few will have the specialist expertise to rival our own editorial team, each of whom has many years' experience in writing about the optical communications industry.

We can also help improve your existing content so that it appeals to a wider audience.

Every project will be different so we will work with you to create a finished piece that enhances your brand image and places you at the forefront of your industry.

Case Study/Viewpoint/ White Paper writing service:

Well-written content can be a hugely effective way of framing your technology, so let's work together to tell the story within the story. A member of our team will work with you to create your content, providing you with a finished product written in our style, and fitting perfectly with the 'feel' of *Fibre Systems*.

£500 per 1,000 words

Editing and copy improvement service:

Where your content doesn't quite meet our own high editorial standards, we can help with copy improvement and editing. We will only charge you for the time it takes to satisfy our editors.

£50 per hour standard rate

Creative artwork services

We have our own in-house design team, who have decades of experience in creating beautiful artwork and page layouts. Not only do they have the skills, but they are also used to working with clients like you and the sort of products and services you offer.

Print advertising design service

- Adverts designed for use only with Europa Science publications £595 per advert;
- Adverts design, including copyrights £1995 per advert;
- Advert amendments (as part of same campaign), £100 per amend.

Digital advertising design service

- Adverts designed for use only with Europa Science publications £595 per advert;
- Animated digital (multiple pane) advert £895;
- Advert design, including copyrights £1995 per advert (single or multiple pane).
- Amends £100 each.

Non bleed ad
189mm (W) x 85mm

Recommendation

If you are supplying a bleed ad we recommend that any text or important information is placed at least 10mm from the edge of the advert, to allow for any discrepancies when the magazine is trimmed at the printers.

Trim

These dimensions are where the page will be cut if you would like your advert to run right to the edge of the page, and represents the final dimensions of the printed magazine.

Bleed

In printing, bleed is printing that goes beyond the edge of where the sheet will be trimmed. In other words, the bleed is the area to be trimmed off.

Non bleed ad

This is the size to create your ad if you wish the advert to have white space all around it on the page, and not run to the edge of the page.

Digital file requirements

PDF-X1a, PDF, EPS, TIFF files are all accepted. All high-resolution images and fonts must be embedded in files. Images must be 300dpi/cmyk

A complete list of deadline dates can be found on page 7 of these specifications. Please make a note of these when planning your submissions.
